TexasIsHot and SaveOnEnergy.com -- A Win-Win for Texas Consumers  
SAVE ON ENERGY.COM Why do we need it?  
There are only two ways to lower your electricity bills: use less energy or pay more for it. While Texas still is not ranked as the most energy-efficient state, SaveOnEnergy.com helps consumers save substantially by providing energy-saving tips to their electric bills.

**Save \$ Today!**  
Summer Energy Saving Checklist  
Did your thermostat have you in a bind? Better yet, you can save money on summer air conditioning. Clean or replace air conditioning filters and conditioning coils. Make sure your air conditioning unit is properly sized for your home. And if you have a programmable thermostat, make sure it's set to save energy. Turn off your air conditioning when you're not at home. And if you have a programmable thermostat, make sure it's set to save energy. Turn off your air conditioning when you're not at home. **SAVE ON ENERGY.COM**  
May the best rate win!

**Welcome to the TexasIsHot Preferred Energy Savings Program!**  
Energy bills are calculated by multiplying the amount of the appliance you use (measured in kilowatt hours) by the rate per kilowatt hour (or "cents"). Other than government-provided taxes and fees, consumption and rate are the only two inputs in your electric bill.  
This means that we use only two ways to lower your electric bill - use less electricity and buy the electricity you do use at a lower price.  
Which TexasIsHot is dedicated to promoting the benefits of using less electricity. TexasIsHot has partnered with SaveOnEnergy.com to help consumers take advantage of the competitive electric market in Texas by saving money on energy prices. Through the TexasIsHot Preferred Energy Savings Program, SaveOnEnergy.com provides consumers with the tools to make fuel, compare and choose competitive energy services. Tip of the Day

Tom there at Turn off lights, TVs and other items in a room. You'll save electricity and generate less heat, meaning the air conditioner will run less.
