Message:

To whom it may concern,

I am writing in regards to the Texas 2021 redistricting process. I am a GIS mapping professional with 20+ years experience in demographic research and cartography. Computer mapping has come a long way in the past 20 years. Where drawing lines used to be a difficult and tedious process, now it can be done easily and fairly using mapping software. There is mapping software available that can crunch census data and draw lines in a fraction of the time it would take a human.

Please consider taking the politics and the capacity for human error out of the redistricting process. And save the State of Texas some money in the process.

Thanks for your time.

Shelley Broyles  
Dallas, Texas
