Message:

Districts should be grouped by geographic area. On the map, US District 2 appears as two separate circles joined by a thin line. Those circles are Kingwood in Northeast Houston and far west Houston. The thin line runs through the Heights. While the demographics of the voters may be similar, the issues faced by each location are very different. Examples: storms, flooding, crime. It's possible for our representative to live in a neighborhood that is not consistent with the whole district. Our representative should experience the same environment as his/her constituents. We need more geographically cohesive districts. That leaves voters and constituents poorly represented. Please draw the new districts more geographically responsible.
