

Developing a Long-Term Strategy  
for  
Higher Education

Presentation for:  
Senate Subcommittee on Higher Education

June 25, 2008

Texas needs a long-term  
strategic plan

Texas has made **significant progress** on *Closing the Gaps*, but we face **new challenges** that require us to more systematically plan for the employment of infrastructure and resources for higher education.

## Challenges facing Texas higher education

Dramatic shifts in state demographics, increasing fiscal pressures on institutions and the state, and future workforce needs challenge Texas policymaker to develop a long-term strategy to efficiently and effectively deploy higher education resources and infrastructure.

5

THECB

### Challenge #1:

Population growth and demographic shifts will increasingly strain state higher education resources and infrastructure

6

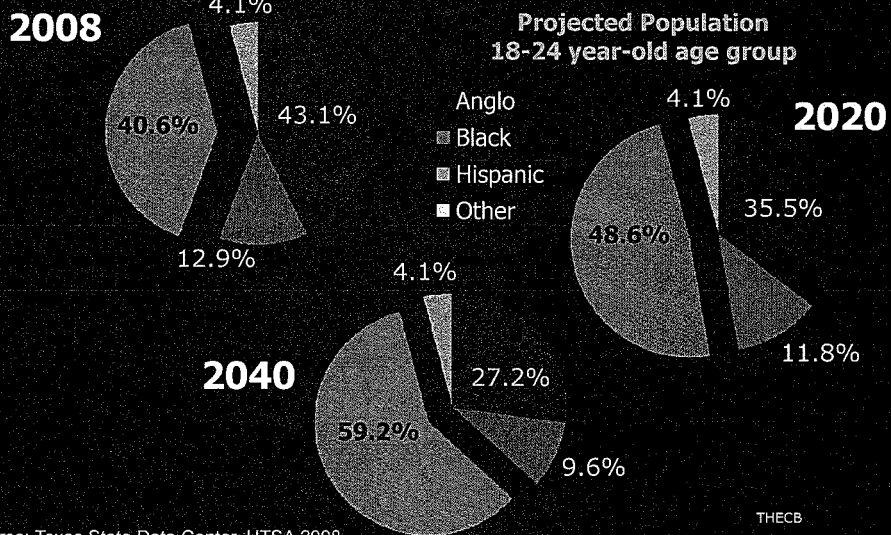

THECB

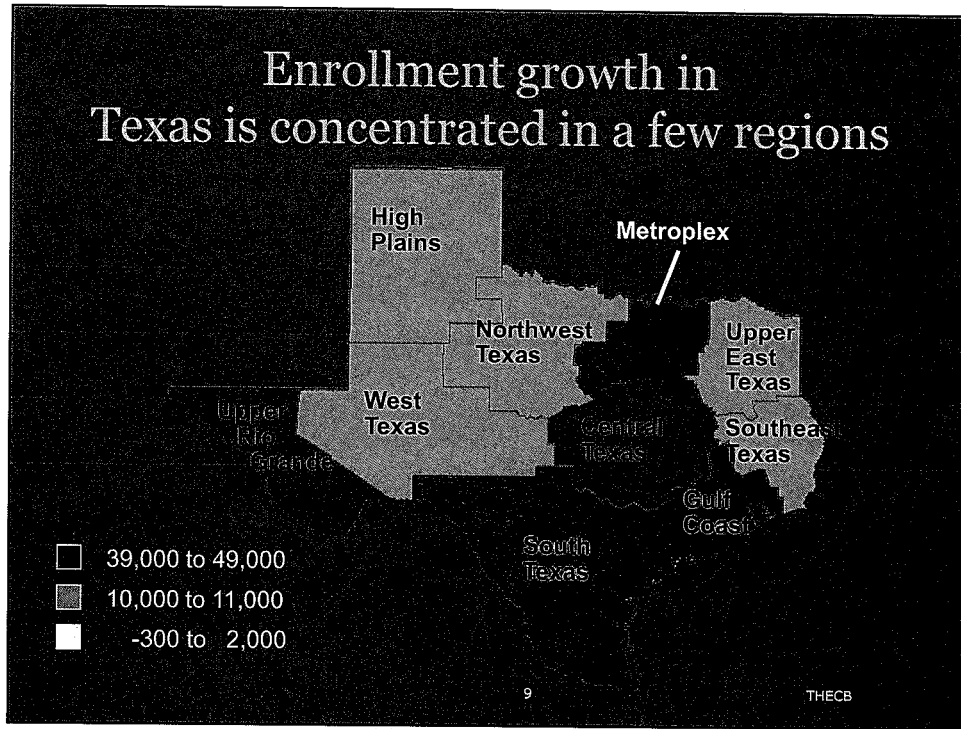

### Texas has the largest increase in population among the 10 fastest growing states

State	2000 Population	2007 Population	Change 2000-07	% Change 2000-07
<b>Texas</b>	<b>20,851,820</b>	<b>23,904,380</b>	<b>3,052,560</b>	<b>14.6</b>
California	33,871,648	36,553,215	2,681,567	7.9
Florida	15,982,378	18,251,243	2,268,865	14.2
Georgia	8,186,453	9,544,750	1,358,297	16.6
Arizona	5,130,632	6,338,755	1,208,123	23.5
North Carolina	8,049,313	9,061,032	1,011,719	12.6
Nevada	1,998,257	2,565,382	671,125	28.4
Virginia	7,078,515	7,712,091	633,576	9.0
Washington	5,894,121	6,468,424	574,303	9.7
Colorado	4,301,261	4,861,515	560,254	13.0

### Hispanic college-age population is growing significantly

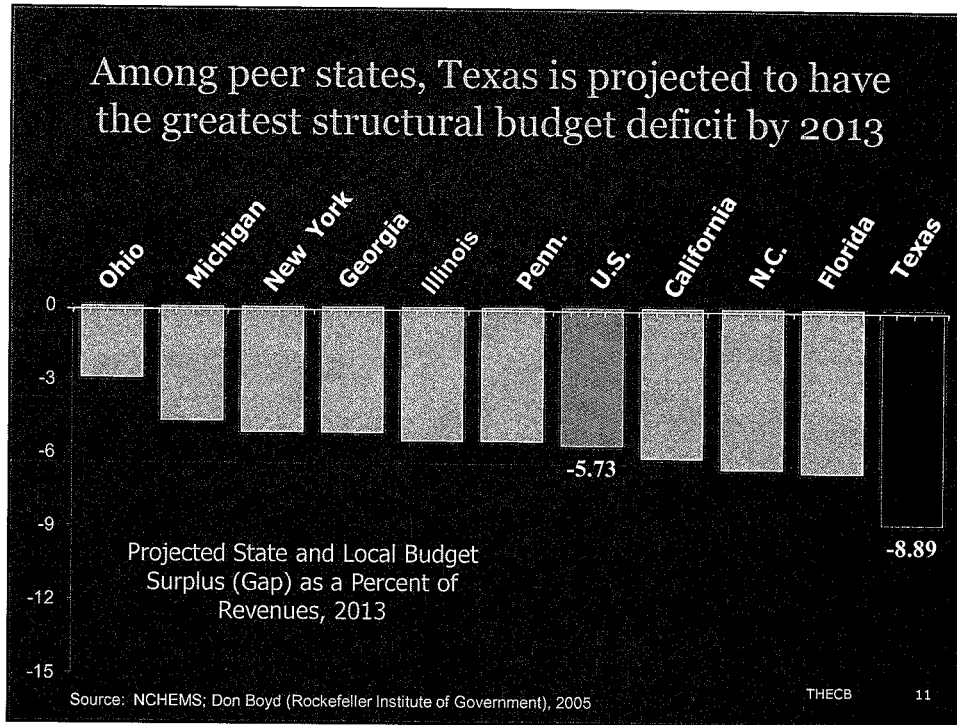

### Challenge #2:

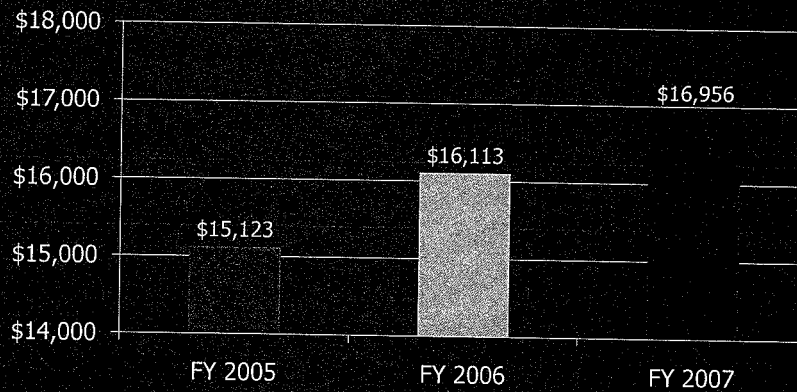

Fiscal pressures will continue to mount at both the state and institutional levels

10 THECB

- ### Estimated infrastructure and operational expenses given current practices
- Total new capital construction costs to meet participation goals by 2015:
    - ❖ Public Universities: \$3.2 billion
    - ❖ Public Community Colleges: \$6.2 billion
  - Total new faculty and cost to meet participation goals by 2015:
    - ❖ Public Universities: 7,400 (\$381.5 million)
    - ❖ Public Community Colleges: 13,400 (\$449.4 million)
- 12 THECB

### Operating expenses per full-time equivalent student have increased (General Academic Teaching Institutions)

13

THECB

### Texas universities have invested more in faculty and their salaries, which is a significant cost-driver

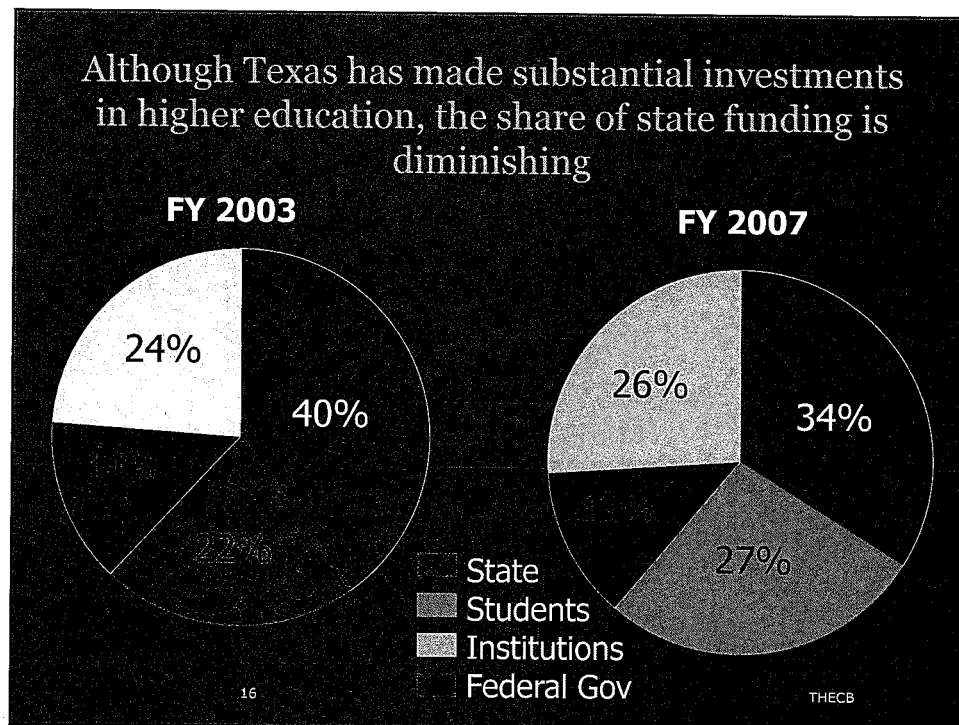

- Texas universities have added **1,175 full-time equivalent faculty members** since FY 2003—a 10 percent increase
- Texas universities have increased the average salary for full-time equivalent faculty members from \$63,399 in FY 03 to \$80,341—a **27 percent increase**. This includes all faculty ranks.

National Salaries (Professor)	10-State Average	Texas
FY 2000	\$80,563	\$76,192
FY 2007	\$102,752	\$99,683
% increase	28%	24%

14

THECB

Texas is above the U.S. average, but below some key peer states in state support

State Support per FTSE  
FY 2007

Tuition at Texas' 4-year institutions is comparable to national peers, while community colleges remain relatively inexpensive

2007-08 Tuition & Required Fees  
(Texas vs. National Average)

Source: Washington Higher Education Coordinating Board, 2007-2008 Tuition and Fee Rates: A National Comparison, March 2008.

Texas is below national average in net tuition collections of all institutions per student

**Net Tuition per FTSE**  
FY 2007

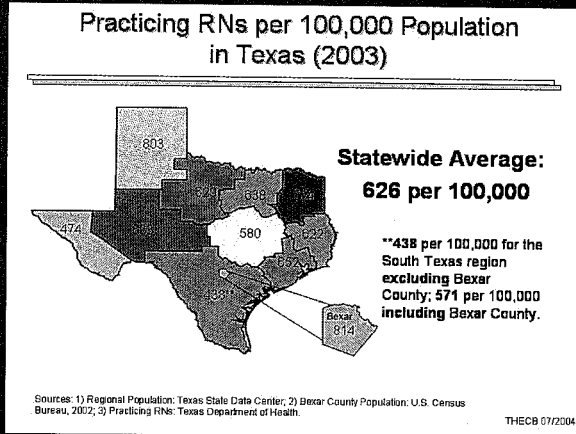

**Challenge #3:**

Workforce demands of the 21<sup>st</sup> century continues to drive educational demands

## Texas is challenged to equitably distribute resources regionally to meet critical workforce needs

- ✓ Professional degree attainment and employment trends are a key indicator for investing educational resources
- ✓ Some regions of state face challenges in critical fields such as nursing and other health-related fields.

21

THECB

## Texas has ongoing statewide shortages in critical technology fields that drive the new economy

22

THECB

## Long-term Strategic Planning

Texas needs to develop a coherent strategy to effectively and efficiently deploy educational resources that:

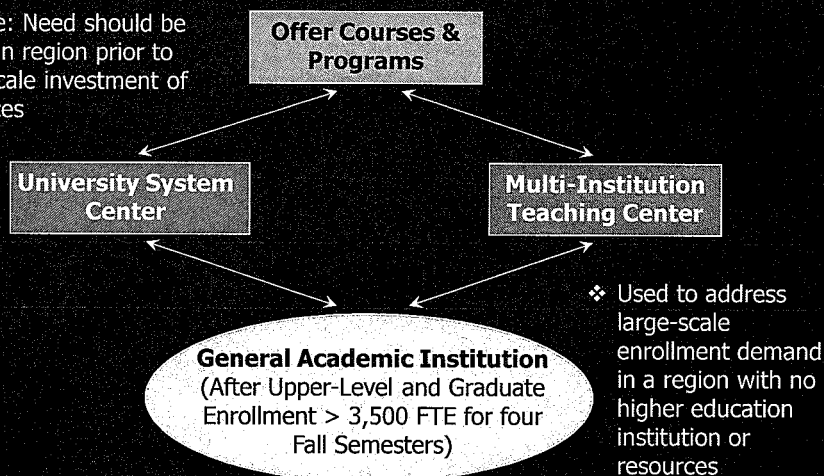

- ✓ Maximizes existing capacity
- ✓ Utilizes innovative delivery models; and
- ✓ Addresses critical workforce/education needs.

23

THECB

## Strategic Planning Supply/Demand Pathway Model

❖ Premise: Need should be tested in region prior to large-scale investment of resources

24

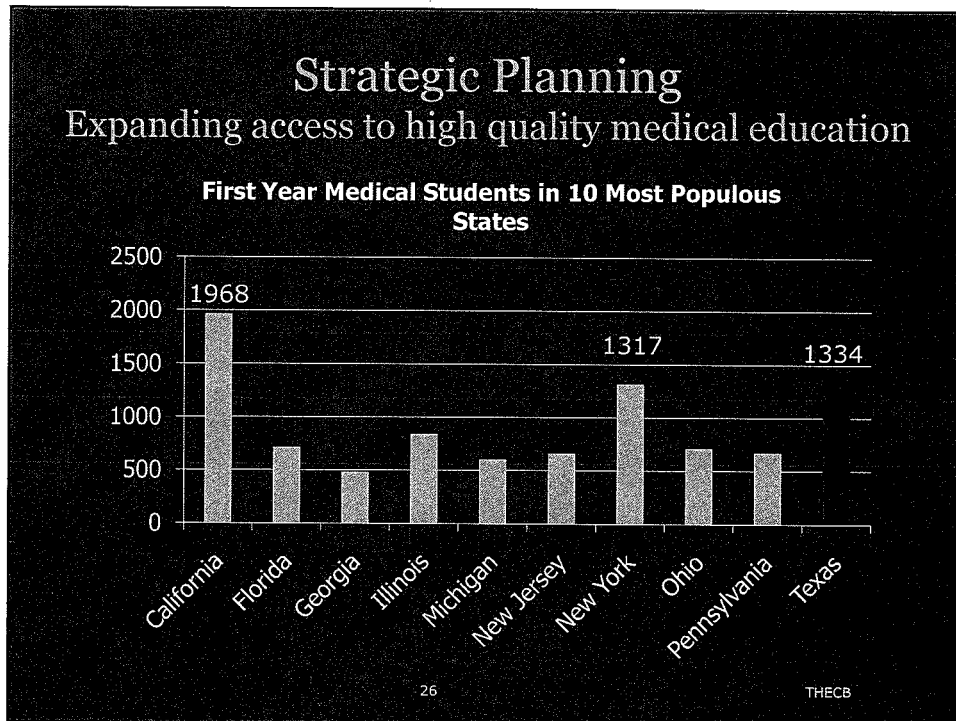

THECB

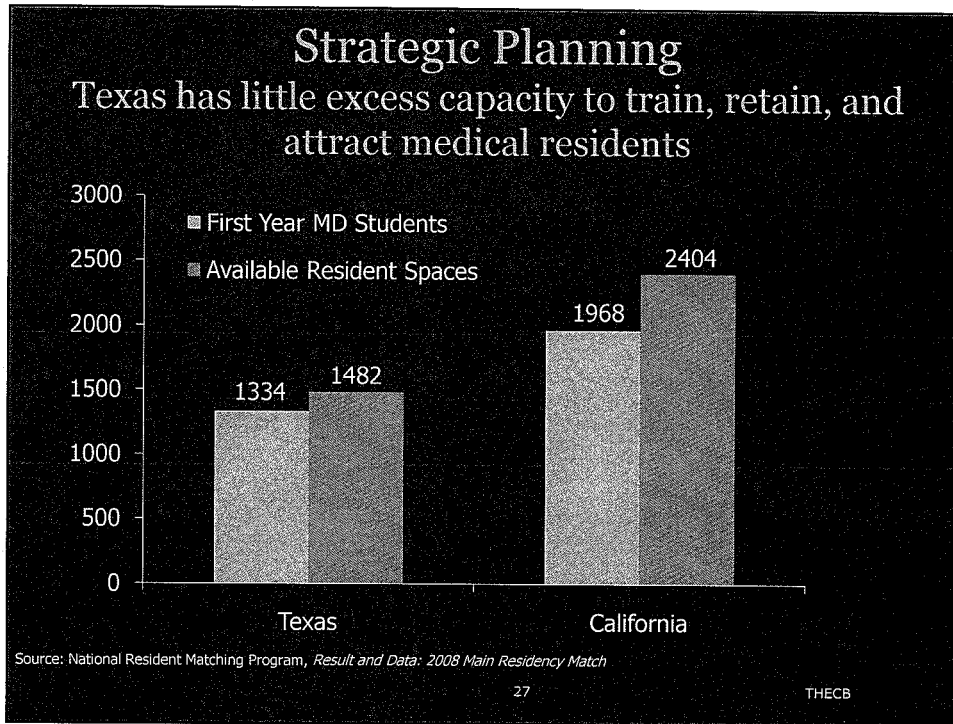

### Strategic Planning

Emphasis on excellent undergraduate education is critical

- 81% of all public university students are undergraduates
- 91% of all public college and university students are undergraduates
- 43% of all public college and university students are freshmen
- Need to improve and measure learning outcomes

25 THECB

### Strategic Planning

Institutions with medical schools are at a competitive advantage for Federal R&D expenditures

FY 2005		
1	Johns Hopkins	\$1,444 million
2	University of Michigan	\$809 million
3	University of Wisconsin	\$798 million
4	UC Los Angeles	\$786 million
5	UC San Francisco	\$754 million
6	UC San Diego	\$721 million
7	Stanford University	\$715 million
15	UC Berkeley	\$555 million
25	Texas A&M	\$480 million
26	Baylor College of Medicine	\$459 million
32	UT Austin	\$411 million
46	UT Southwestern	\$321 million

Source: National Science Foundation

THECB

## Strategic Planning

Identifying innovative ways to deliver educational resources

- ✓ Expand distance education models
- ✓ Institutionalize 2+2 models
- ✓ Strengthen existing flagships
- ✓ Create more national research universities
- ✓ Strengthen undergraduate education

29

THECB

## Economic Benefits of Achieving the Goals of Closing the Gaps

- By 2030:
  - For every \$1 the state invests in higher education, it receives approximately \$8 in return.
  - Annual gains (in 2006 dollars) of:
    - ▣ \$489.6 billion in total spending
    - ▣ \$194.5 billion increase in gross state product
    - ▣ \$121.9 billion increase in personal income
    - ▣ 1,023,281 increase in permanent jobs
