Here is the YouTube that we spoke of. In it I mentioned the study on "Artificial Light" ...So I have attached a copy for the Committee.

<http://www.youtube.com/watch?v=DWHfA3rr7os>

I have also attached my last correspondence with CenterPoint Energy. The customer division of the PUCT also has a copy of this correspondence. I would like, at the very least, my letter entered into the public record for the public hearing held today, October 9, 2012.

I am extremely concerned that my situation was brought up in a misleading way. I called to participate as an invited speaker and was told that I could only comment as part of the public, however there were 4 extra invited speakers from the public included in today's hearing.

My utmost concern is that my experience with the installer be portrayed accurately. I did not just chase a man off my property because of a smart meter...the installer was so aggressive that he physically ASSAULTED me, not to mention not identifying himself, trespassing, and totally ignoring the procedures established by CenterPoint.

In addition, the Senators asked about how Smart Meters were connected to "Agenda 21". The explanations given did not show the connection. The Committee needs to know that the United States of America signed onto a regulatory treaty back in 1987. Those treaties created a United Nations Entity called the "International Telecommunications Union" (ITU). The ITU has been heavily involved in promoting the smart meters and the smart grid. There is a push to connect energy worldwide. There are many documents that I could file to inform this Committee and others, but for now, let me send you a link for the ITU as it relates to the smart metering and smart grids.
