Message:  
Hello,

I am petitioning for the office of the 23rd Congressional district. I am campaigning to see the redistricting of the 23rd Congressional District be partitioned in order to make space for a green energy corridor as part of my community infrastructure and economic restoration project. Please share my concerns for this portion of the West Permian Basin that is being affected by the overproduction of oil within the area. The area would benefit greatly by creating a 37th Congressional District which I will be campaigning for vigorously.

The region has been long neglected and corruption and crime are on the rise. The area was affected greatly by human rights violations in recent years due to the concentration camps that were established here. To be clear, I am registering for the 23rd Congressional District while having high hopes that the Redistricting committee will see the benefit of approving a 37th Congressional District that would include the five counties of Hudspeth, Culberson, Jeff Davis, Presidio, and Brewster.

While the remainder of the 23rd Congressional District would remain under the charge of Rep. Gonzales and the 16th District remaining under Rep. Escobar. I am prepared to immediately take on the responsibility of this newly formed 37th Congressional Seat.

Since 1967, there have been only male leadership and oil industry special interests forging the path of the district. In this new era of forming leadership that offers equal presentation and participation in Government Offices, I believe increasing women's representation and environmentally responsible approach to the future development of the West Permian Basin is a good starting point for much-needed community infrastructure reform of the West Permian Basin.
